PROPOSAL: RENTAL FOR USE OF TOWN OF DISCOVERY BAY PROPERTY

Rec 800 currently has use of property owned by Robert Cecchini near the lighthouse for disposal of organic material, primarily seaweed. Mr. Cecchini is terminating the site for further use.

Delta Seaweed Removal has utilized the site for many years for disposal of seaweed and hyacinths during the course of business. We must now locate a new site as the current location is becoming unavailable.

The Town of Discovery Bay has property beyond a locked gated area along the back side of the golf course near HYW 4 in the maintenance area. The site will make a secure location for DSR to unload aquatic organic matter. By regularly spreading out the weeds it will allow for speedy drying out, reduction of mass and reduction of any possible odor. If there is any remaining matter at the end of the season, if necessary it will be disposed of or removed.

The primary months of operation are mid April through mid October, depending on weather. DSR proposes to rent the property for \$300 per month for year round use, with the harvesting equipment remaining in the secure location October through April when not in active use. We are interested in an initial term of five years.

Attached are photos of a) the proposed site b) the boat with barge in the water c) the truck with loaded barge on land.

Thank you for consideration in this matter.
