

New Dates of When Construction Will Take Place

August 27 – September 11, 2020

***Excluding Weekends**

**The new anticipated start date is
Thursday, August 27, 2020.**

**The drilling will take approximately
2 weeks to complete.**

Construction Phase One

During the first week of construction (8/27 – 9/3), the driller will drill a test hole at the well site.

Construction Phase Two

During the first week of construction (9/4 – 9/11), the driller will construct the monitoring well in the reamed-out test hole.

All motorized equipment used during the drilling process is equipped with mufflers for sound reduction.

Rescheduled Construction Dates

August 27 – September 11, 2020

7am – 6pm *Excluding Weekends

Original Construction Dates: August 17–28

**During this time there will be
moderate construction noise
in your area.**

Test Hole for Well #8 Construction

The District will be drilling a test hole and constructing a monitoring well on the Pantages property to investigate ground water conditions at this site.

Information collected from the test hole drilling will be used to design a new well to supply the District with fresh groundwater.

Construction Hours

All work during this construction will be conducted Monday through Friday, between the business hours of 7 a.m. and 6 p.m. No work will be required on weekends.
