

WE WANT YOUR INPUT ON CLIPPER DRIVE LINEAR PARK PROJECT

The Town of Discovery Bay is applying for a grant with the California State Parks Proposition 68 Statewide Park Program.

Through the site selection process required in the grant, Town staff has selected a project on Clipper Drive with an initial vision of turning this site into a “Linear Park”. This is a Competitive Grant Program, and the goal is to gather community input to reach specific goals listed below.

Goal 1: Get resident input to reach a general agreement on the selection of the recreation features and design details for those recreation features.

Goal 2: Get resident input to reach a general agreement on the location of the recreation features within the selected area.

Goal 3: Get resident input to reach a general agreement for park design ideas, including solutions for safe public use and park beautification such as landscaping and public art.

To participate you must register in advance. Please contact the Community Center at 925-634-1733. We would love to hear your ideas and have you as part of this discussion.
